# ASSIGNMENT – 05
# Student Admission Automation Suite

Name: Saisanjay SS

Register No: 240701458

## 1. Objective

To create an automation layer for the Student Admission Enquiry application using all eight Zoho Creator Workflow options, reducing manual work from enquiry submission to admission confirmation.

## 2. Application Details

| Item | Details |
|---|---|
| Application | Student Admission Enquiry Management |
| Base Form | Admission_Enquiry_Form |
| Base Report | Admission_Enquiry_Report |
| Users | Applicants/Parents, Admission Cell, Coordinators, Dean/Admission Head |

## 3. Workflow Options

| Option | Workflow Name | Purpose |
|---|---|---|
| Form Workflows | On_Enquiry_Submit_Workflow | Send acknowledgement email and notify Admission Cell on submission. |
| Schedules | Daily_Counselling_Reminder_Schedule | Send next-day counselling reminders daily at 5:00 PM. |
| Approvals | Scholarship_Waiver_Approval | Route scholarship waivers above the threshold to Dean/Admission Head. |
| Payments | Application_Fee_Payment_Workflow | Generate payment link and update payment status. |
| Blueprints | Admission_Lifecycle_Blueprint | Control stages from enquiry to admission or rejection. |
| Batch Workflows | Bulk_Admission_Confirmation_Batch | Send confirmation letters to admitted applicants in batches of 200. |
| Report Workflows | OnEdit_Recalculate_NetFee_Workflow | Recalculate net fee when fee or scholarship changes in the report. |
| Functions | Generate_AdmissionLetter_Function | Generate and email admission confirmation PDF. |

## 4. Implementation Steps

1. Open Zoho Creatorand the Student Admission Enquiry Management application.
2. Open Admission_Enquiry_Form and verify the required fields.
3. Create the form workflow for acknowledgement and Admission Cell notification.
4. Create the daily schedule for next-day counselling reminders.
5. Create the scholarship approval process with Dean/Admission Head approval.
6. Configure the payment workflow using the computed net application fee.
7. Create the Blueprint with controlled stages and role-based transitions.
8. Create the batch workflow for admitted applicants, using a batch size of 200.
9. Create the report workflow to recalculate the net fee after relevant edits.
10. Write the reusable Deluge function for generating and emailing the admission letter.
11. Test each automation and capture the configuration and output screenshots.

## 5. Governance Rules

- Invalid applicant emails should be logged without blocking submission.
- Only one counselling reminder should be sent per session.
- Use a primary and fallback approver for scholarship waivers.
- Retry payment status callbacks up to three times.
- Require a comment for every Blueprint stage transition.
- Allow the batch size to be configured, with 200 as the default.
- Run report recalculation only when fee or scholarship fields change.
- Validate Student Name and Preferred Course before generating an admission letter.

## 6. Sample Output Images

### 1. Workflow Builder

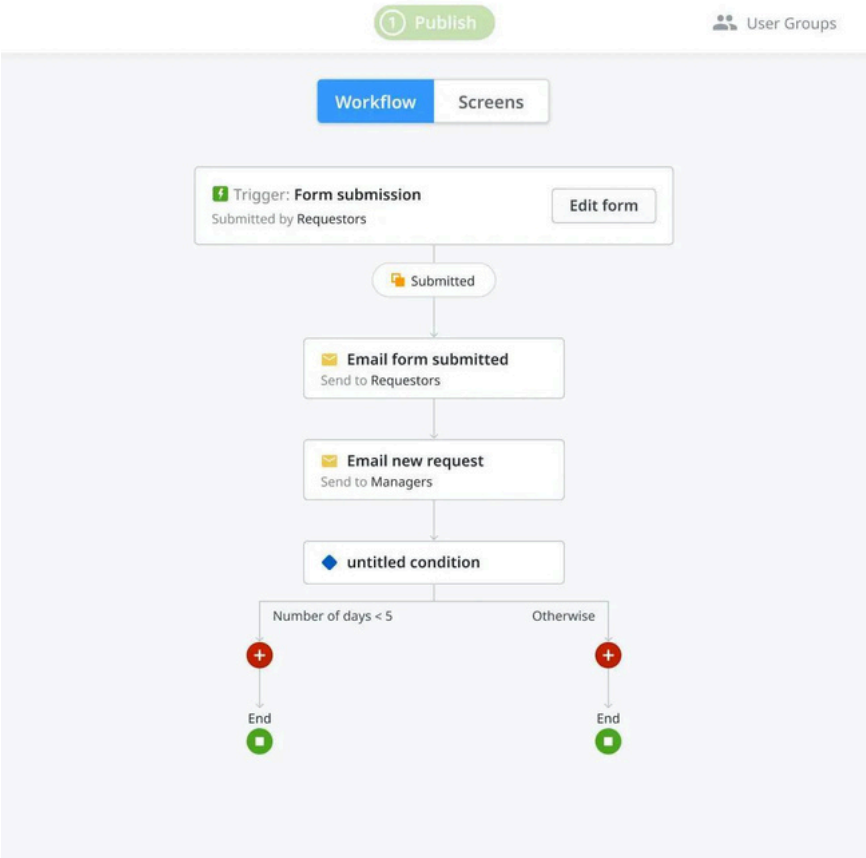

Figure 1: Sample form workflow showing acknowledgement and notification. These are illustrative samples and must be replaced with actual Zoho Creator evidence.

## 2. Blueprint

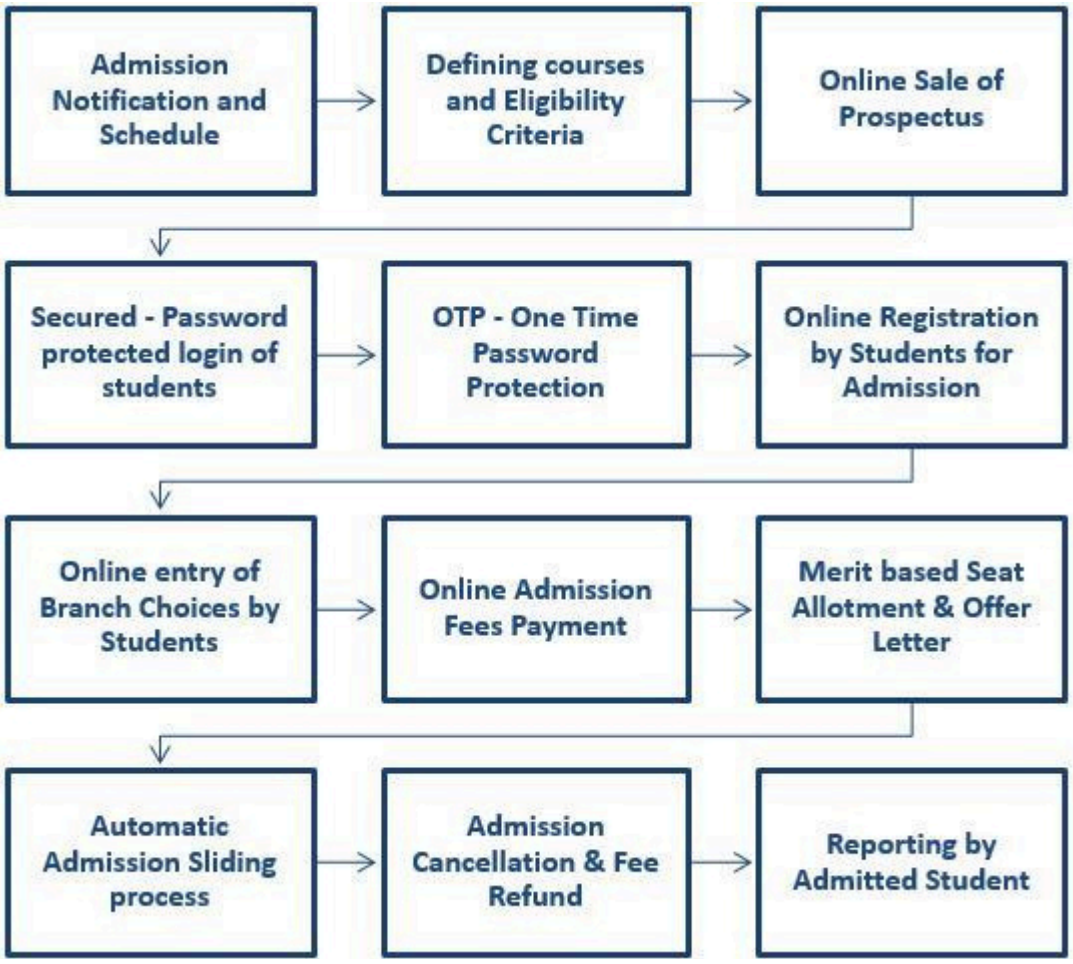

Figure 2: Sample admission lifecycle Blueprint. These are illustrative samples and mustbe replaced with actual Zoho Creator evidence.

## 3. Acknowledgement Email and Payment

## 7. End-to-End Workflow

The applicant submits the form, receives acknowledgement, and gets a payment link. Scholarship cases go for approval. The record then moves through the Blueprint stages. Counselling reminders are sent daily. When the applicant is admitted, the admission letter function generates and emails the confirmation PDF. At the end of a counselling round, the Admission Cell runs the batch confirmation workflow.

## 8. Result

The Student Admission Automation Suite was designed using all eight Zoho Creator Workflow options. It supports automated communication, fee collection, scholarship approval, controlled status transitions, batch notifications, fee recalculation, and reusable admission-letter generation.
